

Invitation
to
Sino-Nordic Health Tech Match Making Conference in Zhejiang, China

13. sept.2018

Situated in the south of Yangtze River Delta and along China's southeast coast, Zhejiang Province have a residential population of 56.6 million by the end of 2017. Zhejiang has a long-standing reputation as "a land of fish and rice, home to silk and tea, a place of rich cultural heritage and a tourist paradise".

Zhejiang province is among the richest area in China. In 2017, Zhejiang province GDP reached 5.16 trillion RMB. Zhejiang province has the cluster of different business sectors and most active business activities in China. Zhejiang Area nourished many world-famous companies in the world, such as Alibaba.

Denmark has long collaboration relationship with Zhejiang province. Zealand region has the friendship collaboration with Zhejiang province for long time. In June 2016, Zhejiang province and Zealand region updated the collaboration Memorandum of Further Cooperation and Exchange. One of the collaboration areas is to conduct exchanges and cooperation in health care, smart information medical technology in particular, and to focus on nursing of senior citizens so as to cope with the increasingly serious problem of aging population in both province and region.

Zhejiang Province in China

In the updated collaboration Memorandum of Further Cooperation and Exchange between Zhejiang province and Zealand region, the Sino-Danish Innovation Park (Shangyu Hangzhou Bay) is also mentioned.

The location of Shangyu

The administrative committee of Hangzhou Bay Shangyu economic and technological development zone signed the Co-construction Zhejiang Sino-Danish (Hangzhou Bay

Shangyu) Industrial Park agreement with Copenhagen Capacity on April 17th, 2015. The aim is to actively promote both sides in the fields of modern pharmaceutical, green energy, green building, energy-saving, environmental protection and other areas of industrial cooperation, to strengthen the both-way exchange and cooperation in the fields of industry, finance, science & technology, talent development and innovation. This will takes place through the construction and development of the Park, to create green industry base of Zhejiang province and European enterprise cluster development and demonstration base together.

The Sino-Danish Innovation Park is focus on water & waste treatment, green energy, smart solutions, air purification, health tech and pharma medical industry. The Sino-Danish Innovation Park will promote the collaboration between Chinese companies and Nordic companies to work on water & waste treatment,

green energy, smart solutions, air purification, health tech and pharma medical industry, to cope with the environmental, health care and aging problems in China.

Since 2015, several conferences and seminars have been held to promote the communication and collaboration between Chinese companies and Nordic companies. Many Nordic companies and Chinese companies have established the collaboration relationship and several joint venture companies between Chinese companies and Nordic companies have been established.

In June 2018, Shangyu organized a business delegation visit to Denmark with Shangyu leading companies as part of the delegation. The delegation held a seminar in Copenhagen with Nordic organizations and Nordic companies. On this seminar, Shangyu signed the collaboration agreement with Copenhagen Bio Science Park to work together to promote the communication and collaboration between Chinese health tech companies and Danish health tech companies. Shangyu also signed the collaboration agreement with Norway Health Tech Cluster to promote the communication and collaboration between Chinese health tech companies and Norwegian health tech companies.

In Shangyu Hangzhou Bay area, there is a cluster of biological medicine companies, mainly focusing on bioengineering, medicine preparation industry and new medicine R&D industry. There are many bio pharma medical companies in the area. The total output value in 2016 is 15 billion RMB. Several companies in the area are the leading companies in China. There are also companies working on healthcare technologies to hospitals, healthcare clinic and elderly care.

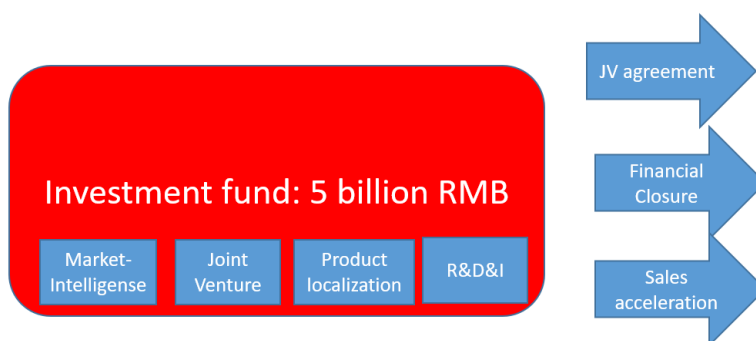

Shangyu has established its Pharmaceutical Industry Park where Shangyu could provide the existing workshop and several companies use it as production workshop for its products.

Besides, the existing Pharmaceutical Industry Park, the new industry service center is under construction, which will be completed in 2019. The new industry service center will have the R&D facilities for pharma medical industry, incubation center, and comprehensive service package.

In August 2017, Shangyu established business collaboration with China leading pharma medical company-[Menovo](#) and [Porton](#). They established together the foundation with 5 billion RMB. The foundation will focus on the investment on Sino-Nordic pharma medical and health tech industries. The investment can takes place in areas as illustrated in the figure below.

Shangyu Investment foundation
