

Shangyu Healthcare Conference Chinese Companies

Zhejiang Guobang Pharmaceutical Co., Ltd

Zhejiang Guobang Pharmaceutical Co., Ltd. is a wholly foreign owned enterprise located in Hangzhou Bay Shangyu Economic & Development Area(HSEDA), Zhejiang Province and situated in the very center of the train line connecting Hangzhou and Ningbo.

As a hi-tech enterprise at provincial level, the company has a post-doctoral research station and a technology center. The company is a major manufacturer of such synthesis drug materials as Azithromycin, Clarithromycin, Roxithromycin, Ciprofloxacin and Deoxifluorine. As the largest supplier of Enrofloxacin in the world, the company also enjoys great reputation throughout the whole country in terms of veterinary drug materials. All products pass GMP certification conducted by State Food and Drug Administration and Ministry of Agriculture of PRC. In addition, the company has gradually implemented COD and FDA certifications in accordance with customers' requirements. Implementation of safety DCS and multiple environmental measures are widely recognized in the sector.

Covering an area of 175,000 square meters, the company has more than 10 workshops of bulk drugs at different sizes. The company actively enlarges the supply to international counterparties, and strives to promote cooperation mode that develops approved products together with domestic formulation enterprises. Zhejiang Guobang Pharmaceutical Co.,Ltd. is a very professional supplier of bulk drugs with global reputation.

Zhejiang NHU Co., Ltd

Established in 1999, Zhejiang NHU Co.,Ltd specializes in the production of bulk pharmaceutical chemicals, medications, health products, food additives, feed additives, flavors and aromas. NHU has modern production bases in Xinchang, Meizhu, Shangyu and Shandong. In 2004, NHU was listed as the first enterprise in Small-and Medium-sized Enterprises Board in Shenzhen with the stock code of 002001.

NHU has a state-level technology center, a National Postdoctoral Research &Development Center, and has developed 14 state-level new products,13 National Torch Plan Projects, 1 National Key Technology Research & Development Program, 2 National Science and Technology Support Programs, 2 National High Technology Research & Development Program of China (863 Program) and obtained 64 patent licenses. NHU is a Chinese Famous Trademark, and Vitamin feed branded NHU is a Chinese Famous Product. In 2011, the new green synthesis process and industrialization of soluble Vitamins and carotenoid achieved the second prize of the National Science and Technology Invention Award.

Shangyu production base, located in Hangzhou Bay Shangyu Economic Development Area, covering an area of 666,000 square meters, with 3 billion yuan of total investment. The company has three enterprises, Shangyu NHU Bio-Chem Co.,Ltd., Zhejiang NHU Pharmaceutical Co.,Ltd., and Zhejiang NHU Construction Material Co., Ltd.. Main products are vitamin A (E), carotenoids, PPS and other special engineering plastics.

The Shangyu production base is performing TPM management and sustainable development of environmental protection. Established a research and innovation center, it makesbreakthroughs of key technologies in organic synthesis and bio-fermentation. It implemented several national Torch Program and 863 Projects, to create a world-class manufacturing base of fine chemical products.

Zhejiang Jingxin Pharmaceutical Co., Ltd

Zhejiang Jingxin Pharmaceutical Co., Ltd. is a listed pharmaceutical company, integrating R & D, manufacturing and marketing. It ranks top 100 of the chemical pharmaceutical enterprises in China. At present, the company's registered capital is 320 million CNY and total asset is 2.9 billion CNY. The company occupies more than 80 ha's land and owning more than 2300 staff and headquarters in both Xinchang and Hangzhou. Five manufacturing bases are now under function, namely, formulations in Xinchang, API & intermediate in Shangyu and Guangfeng, traditional Chinese medicine in Inner Mongolia and medical apparatus and instruments in Shenzhen. Moreover, a R&D center is located in Shanghai Zhangjiang High-Tec Park for advanced drug and API development.

Their products contain drug and medical devices. The drug products covered from API to finished product. Jingxin are one of the biggest manufacturing bases for the APIs of quinolones and occupy a relatively large market share for the product named Ciprofloxacin Hydrochloride and the Levofloxacin Hydrochloride. The product has been distributed to the international market such as South-east of Asia, South Asia, Latin America and Europe, Levofloxacin ranks No. 1 in the sales all around the world.

The company is developing through independent research and development organizations, on the other side, Jingxin is growing via M&A to accelerate the developing pace. In overseas market, Jingxin set up a joint venture in UK in 2014, invested a medical device company in Israel in 2015, got the corporate control of a US pharmaceutical company in 2015.

YongNong BioSciences CO., LTD

The main business of YONGNONG (YONON) is to provide high-quality agrochemical products through product development, production, registration, marketing and distribution. The company builds a complete product chain through, where Glufosinate-ammonium plays a leading role with many other varieties manufactured simultaneously, including herbicides, insecticides and fungicides. The strategy of globalization and branding helps YONON meets worldwide customers' demands with global operation network, high-quality products and value-added services.

YONON has almost 1200 employees working in three manufacturing sites, one technique center, one international trade company and Taiwan branch. The fourth manufacturing site is currently under construction in Jiangsu Province. The company enjoys a continuous sale growth and turnover achieves USD170 million in 2013.

YONON is the world's first generic company to develop and produce Glufosinate-ammonium. Through more than a decade of production, the company now has 2500MT annual production capability for Glufosinate-ammonium tech and has become the world leading Glufosinate-ammonium provider.

YONON constantly invests in pesticide registration to comply with regulatory requirements in developed markets and emerging markets. YONON supports clients with high quality data and expertise for registration in Canada, USA, Brazil, EU and other countries. The company also makes own registrations in Brazil, EU, Australia and Taiwan. One of the key products Picloram technical was approved by Brazilian authorities in 2011 as the first registrant from China mainland while key product Glufosinate-ammonium technical was approved by EU authorities in 2014.

Zhejiang Zhongxin Chemicals Co., Ltd

Zhejiang Zhongxin Chemicals Co., Ltd. is an enterprise of science and technical type specializing in the research, development and production of fine chemicals such as pharmaceutical intermediates. Located in Zhejiang Hangzhou Bay Shangyu Industrial Park, Zhongxin now covers an area of 18667 SQM and has 350 employees, 110 of them have the college record of formal schooling and over, 68 are professional scientists and technicians, 12 have senior professional titles (including 6 doctors and masters), and 35 have medium professional titles. Moreover, there are 5 experts and scholars who studied abroad in their core team.

In cooperation with Shanghai Research Institute of Organic Chemistry, Chinese Academy of Sciences (CAS), the company established the joint Shangyu Zhongke Baiyun Fine Chemical R&D center Co., Ltd. at the end of 2004. As the R&D base of new products and environment-friendly techniques and innovative base for the transfer of technical achievements, this centre has 4,000sqm of R&D building, equipped with leading experimental and inspectional instruments, 3 pilot plants (1,200sqm) and several general-purpose apparatuses for pilot-scale experiment. Moreover, they are the executive body of "The specialized market of fine chemical in online technical market in Zhejiang Province" and "The S&T innovative service platform of environment-friendly fine chemical techniques in Shangyu in Zhejiang province"; through integrating the innovative elements, they have working hard to improve their innovative ability and striving for the sustainable & fast development of fine chemical industry in Zhejiang Province.

Zhejiang Menovo Pharmaceutical Co., Ltd

Zhejiang Menovo Pharmaceuticals Co., Ltd, the second biggest manufacturer site of Ningbo Menovo Pharmaceuticals Group Co., Ltd, located in the Shangyu Industrial Park, Zhejiang Hangzhou Bay. It's a hi-tech enterprise supported by the state with the diversified operation model, advanced scientific and technological development, and intensive management. The company mainly produces pharmaceutical intermediates and APIs based on powerful research and development, test, manufacture and sales. The products involve in the digestive system, central nervous system, blood pressure, lipid regulation and other fields. The company was founded in 2005, with the total investment of more than \$ 14.7 million, the annual output value of 300 million RMB.

The company has nearly 500 employees, including nearly 250 college graduates, covering nearly 50% of total employees. The company relies on universities and research institutions, focuses on technological innovation and transformation, adheres to the "people-oriented, scientific management, quality first, customer first" as its principles, encourages exploration and promotes enterprise on the scale and the brand. The company acquired the ISO9000 and ISO14001 certificates in 2004 and 2011 respectively and passed official GMP audit of Slovenia EU in October 2008.

As China's leading company specialized in the production of new drug research, the company has owned advanced equipment and facilities. The company covers an area of 60,000 square meters, building area covers 30,000 square meters and the plants, more than 18,000 square meters. There are four standard pharmaceutical intermediates production workshops, five fine drying package API production plants, one large fine drying package production plant under construction, a small scale laboratory fully equipped, and an analysis test center which covers 1,000 square meters with configured specialized equipment such as high performance liquid chromatography, gas chromatography, ultraviolet spectrometer, infrared spectrometer, Malvern particle size analyzer.
